

Campus Workshops for Students

2-3 Days Hands on Programs

Introduction

Lifepus Magazine offers short, engaging, and practical workshops designed especially for schools. Conducted over 2–3 days, these programs focus on storytelling, teamwork, and creativity without requiring advanced computer facilities. Students gain hands-on experience and produce tangible creative outputs.

Workshop Theme

Short Film Making

Students learn the basics of scriptwriting, storyboarding, and shooting with DSLR and smartphones. By the end of the workshop, they will have created a 2–3 minute short film as a group project.

Photography

Introduction to composition, framing, and lighting. Students capture life around campus and present a themed photo essay or mini exhibition and contest

Digital Journalism

Basics of interviewing, reporting, and writing short articles. Students produce a one-page newsletter or blog-style story about school life or current events.

Closing Note

Our workshops are interactive, fun, and outcome-driven. They are tailored to inspire students, nurture their creativity, and provide memorable experiences in just a few days. Lifepus Magazine would be delighted to collaborate with your school to bring these creative opportunities to your students.
